"The book gives common-sense advice on everything from academics to how to pack for the dorm. I found a wealth of great advice for my high school student in this book and recommended it to many of my friends. This is a book that students & parents will refer to again and again for no-nonsense answers to an often complicated process." R. McCarthy, Parent

"My onetime colleague at Oklahoma State University, Lance Millis, has written an easy-to-read, lively guide no prospective college student should be without. In clear, concise language, Millis walks high school students and their parents through every step of the process of preparing for life in higher education, covering everything from the rigorous financial aid process and obtaining housing to age-old student dilemmas like time management and spending money. This little book offers an opportunity very similar to most college course material: Read it, learn it, know it." Steffie Corcoran, Senior Editor, Oklahoma Today magazine
